CSI-KCE STUDENTS' CHAPTER
TECHNICAL SEMINAR

Title: Smart Home IoT
Date Conducted: 31.08.2019
Venue: C-202
Resource Person: Ms. S. Ramamani, CSE Dept., KCE.

Report

      As a part of CSI–KCE student's chapter a technical seminar was conducted in C-202. Ms. S. Ramamani explained on how a smart home can be established. A smart home is a residence that uses internet-connected devices to enable the remote monitoring and management of appliances and systems, such as lighting and heating.

      Home automation systems can make all the difference to your quality of life, but they bring important benefits for the rest of us as well. Most obviously, they improve home security, comfort, and convenience. The improvement of comfort in using Smart homes increases.
